

Gone.

What is RapidRedact?

RapidRedact software provides a fast, simple to use method of irreversibly removing selected information from all electronic document types. The software completely removes any record of text or author's changes and cleans hidden code or data from "behind" the document. Since the content is no longer in the document, snooping or hacking into the file cannot reveal the information.

Who uses RapidRedact?

- Litigation support companies
- Law firms
- Court and County Clerks
- Law Enforcement agencies
- Compliance departments
- HR and personnel departments
- Health & medical departments
- Education institutes
- Banking and Financial institutes

Organizations who need to comply with:

- Sarbanes Oxley
- Freedom of Information (FOI)
- Privacy and Data Protection Acts

Release redacted documents with complete confidence

Products

RapidRedact Desktop:

For organizations requiring redaction functionality that allows them to automatically search and redact all types of information including Social Security Numbers, Credit Card Numbers and other personal identifying information.

In addition to being able to automatically redact information, RapidRedact Desktop also provides a range of manual redaction tools to further redact documents.

RapidRedact completely eliminates the need for any other software to meet redaction requirements and even integrates with Adobe Acrobat and Microsoft office applications.

Easily and effectively reduce the time it takes to **redact**, **review** and **release** redacted copies of your documents.

To purchase RapidRedact

For users – License packs are available for a single user, small / med business, or enterprise version with 50 or more seats, with price discounts for volume purchases.
